## Description

### Nimbus 405 Coupe

Powered by Twin Volvo Penta D4-320HP Shaft Drive (640 hp) engines with additional engine options available. Price is for standard boat + options.

This Nimbus Coupé model was designed for people who enjoy social activities, comfortable living quarters, ease of handling while providing excellent long-distance cruising.

The boat has many similarities to her smaller sisters but offers several new features; Nimbus Design Team has added several interesting aesthetic and functionally integrated details. These include twin touch screens at the helm, room for five to ride facing front, a new D-pillar with integrated ventilation, wholly glazed aft deck door, electric powered table on the aft deck and a "granny hatch" that conceals a mains power plug on the stern.

Other innovations include newly designed engine room ventilation in the hull sides with powered extractors, galley with ceramic gas hob and dark composite worktop, 120 litre capacity fridge plus extra cool storage in pull-out drawers beneath the saloon sofa and much more.

### Passion And Love For Boating 1968.

It started in the early seventies when Volvo Penta needed a new kind of boat to suit their newly developed engine. An innovative group of people quickly seized the opportunity to create a new kind of boat for the social lifestyle. The Nimbus 26 was born and along with it a company that would become one of Europe's most renowned boat manufacturers. The company's history is a true success story, a tale of innovation, perfect timing and survival. But most of all a story about people who know about boats and their passion and love for boating. A story still being told.
